## Preventive Services Notice

Preventive care services (well woman) include a routine physical exam and pap smear, if necessary. These visits help prevent health problems prior to symptoms occurring. They do not include tests or services to monitor/manage a condition or disease once it has been diagnosed.

I understand that if symptoms of acute or chronic problems are discussed at my preventive care visit, it is considered diagnostic; therefore, my office visit copay/deductible may apply for the non-preventive part of the visit.
